INNOVATION DRIVES YOU FORWARD

EDIT

CHEREAU, news 2023.

Dear Madam, Dear Sir, Dear customer,

Perhaps you remember our theme at the last Solutrans exhibition:
“ALWAYS BETTER TOGETHER”.

We have organized it into four topics bringing together our latest innovations, which were oriented mostly towards energy transition:

- Better **preserve**: the most virtuous energy is the one we do not consume
- Better **consume**: new energies to preserve the environment
- Better **protect**: the human being at the heart of all our attentions
- Better **operate**: tailor-made support at your service

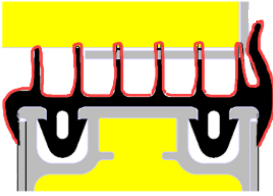

Today, we are pleased to inform you of the launch of some of these innovations, either as standard or as options, on our 2023 production.

We invite you to discover them through this booklet and do not hesitate to contact your CHEREAU sales representative for more details.

Kind regards.

The CHEREAU marketing team.

BETTER PROTECT

Standard

Door seals

New sliding agent for an easier door opening

Option

SafeRamp-C

Rear step with handrail
Access with 3 support points

Option

Meat hanging

Fluid angle turnout
Sliding junction endcaps
Solid partition grid

Standard

New CHEREAU Exclusive Grey*
chassis paint

*

Option

EasyFlex sliding bulkhead

Option

SideLight

Lights enhanced visibility to the rear of the vehicle

Standard

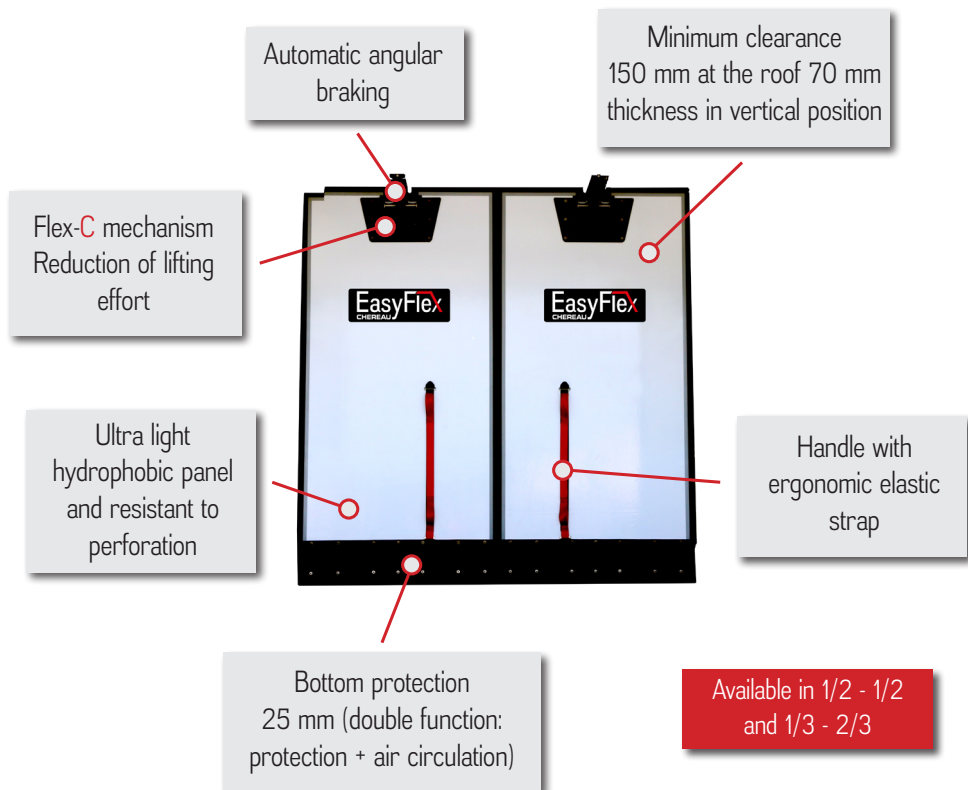

Door retainer

Improved ergonomics and user-friendliness

EasyFlex sliding bulkhead

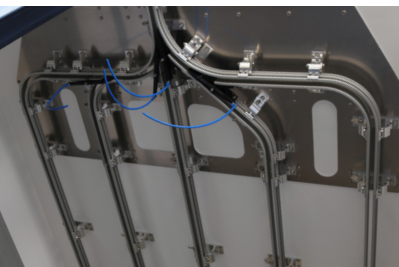

Option

Available from Q4 2023

HIGHLIGHTS:

-  Compatible with 33 pallets in multi-temperature
-  Improved ergonomics
-  Better payload: gain of 100 kg compared to an Easy-C Evo bulkhead 1/2 - 1/2
-  Compactness in vertical or horizontal position, gain of 70 mm compared to the Easy-C sliding bulkhead
-  Easier maintenance thanks to its removal without using lifting tools

Fluid angle turnout:
Reworked curve angles
(45° instead of 90°) Easier
handling for faster loading/
unloading

Sliding junction endcaps:
Make it easier to switch to different
connections

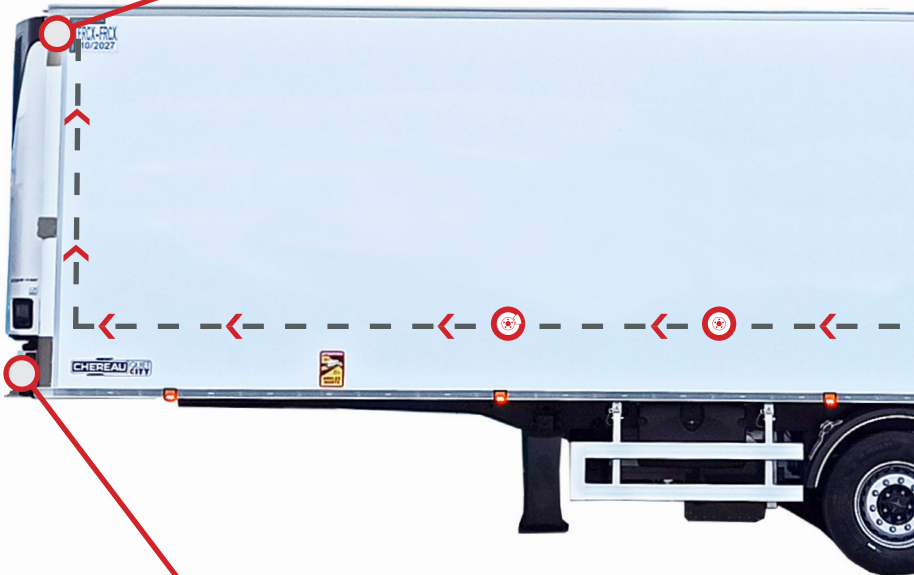

Solid partition grid:
Prevents contact between meat and
pallets or between different types of
meat

Option

Connection between EBS and cooling unit telematics system

Allows the collection of data such as axle load, number of kilometers, brake system fault alerts, tyre pressure and brake pad wear

*Depending on equipment

Standard

ConnectBox

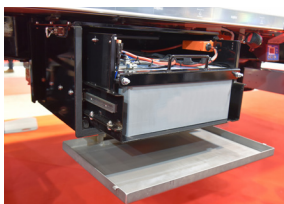

Option

**PIR ceiling light
with presence detection**

Standard

New rear lights

Option

Sliding battery box
Allows quick access to batteries

Evolution of the rear lights

Standard

New bubble light

Old

New

Option

New “non-sided” LED lights: less stock of spare parts
CHEREAU exclusive design

Old

New

Option

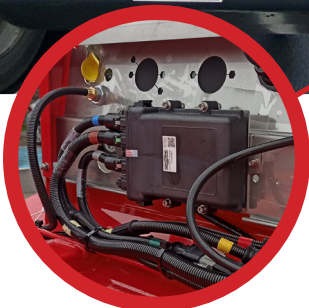

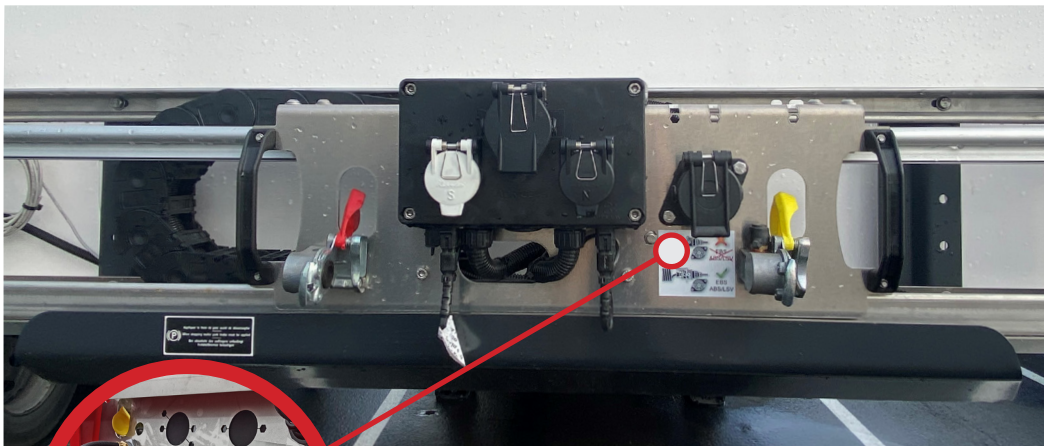

New independently fitted stalk lights to prevent damage to the light in case of an impact

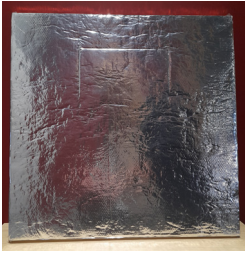

New features for more security:

- Ceiling lights with one minute flash warning before switching off
- Side marker light line flashing with direction indicators
- Active reversing lights if position lights are on: remain on for 10 seconds after reverse gear is switched off to give a clear view of the environment

New electrical architecture:

- Guaranteed interior lighting: automatic power supply to the ceiling lights adapted to all connection configurations (15-pin or 2X7 socket, position lights, taillift battery...)
- Easy maintenance: automatically resetting fuses for the lights

CHEREAU Performance VIP
Vacuum insulation Panels

AeroTop

Saves 0.3 L / 100 km*
in fuel consumption

Reduction of aerodynamic drag

Without AeroTop

With AeroTop

AeroFlap

Saves 0.7 L / 100 km*
in fuel consumption

AeroTop + AeroFlap
= - 1,1 L / 100 km**

* At 80km/h

** Bonus of 0.1L thanks to the combination of the AeroTop and the AeroFlap

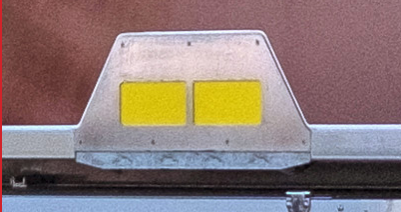

Huckepack

Option

Combined rail-road transport, system allowing to load the complete semi-trailer in a pocket wagon

9 times less CO2 emissions than road transport

Limitation of road traffic

Stainless steel protection integrating the location of the hanging bracket

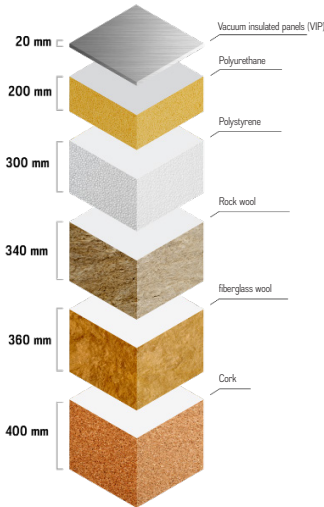

Keeping the anti-projection function

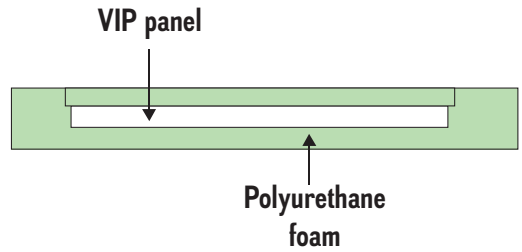

CHEREAU Performance VIP

Vacuum Insulation by CHEREAU

THICKNESSES REQUIRED TO ACHIEVE THE SAME THERMAL RESISTANCE WITH DIFFERENT MATERIALS

The implantation process of VIP panels is patented

HIGHLIGHTS:

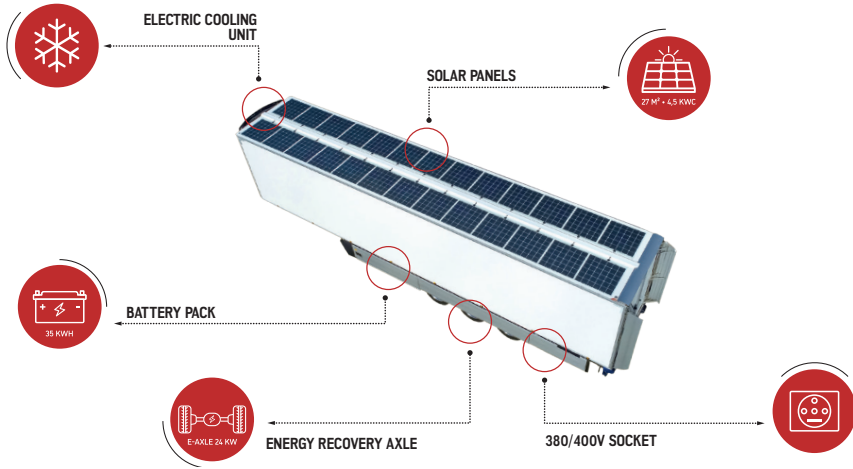

- ⚙️ Significant improvement in performance (K coefficient)
- 📅 Gains in consumption and in running hours for the cooling unit
- 📏 Vehicle range increases proportionately with the gain of K coefficient*
- 🌱 Decrease in CO2 emissions, particles and noise
- 🔧 Maintenance savings on cooling unit
- 🕒 More secure loading in case of a fuel shortage

*See Cemafroid study

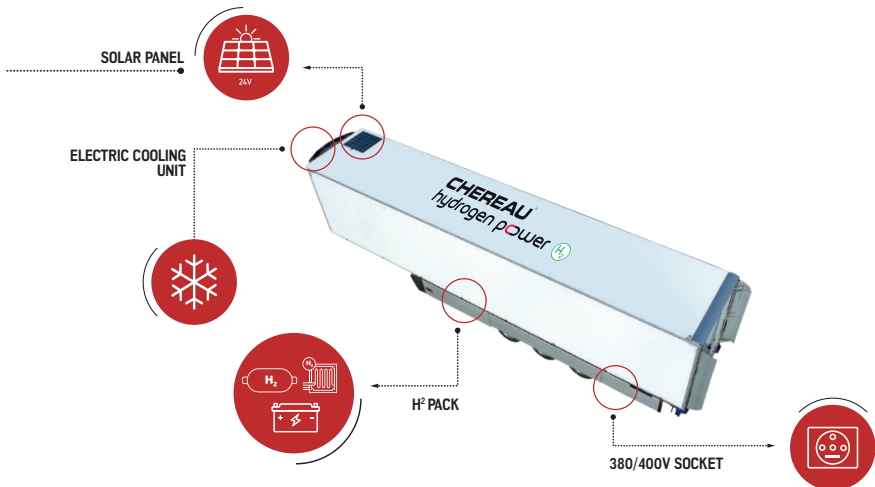

BETTER CONSUME

CHEREAU is still testing in real operation different configurations of zero-emission refrigerated semi-trailer. The purpose is to allow a fast decarbonization of temperature-controlled transport.

SEMI-TRAILER WITH MULTI-SOURCE ELECTRIC COOLING UNIT

SEMI-TRAILER CHEREAU HYDROGEN POWER H²

CUSTOMIZATION

Option

And always the tailor-made by CHEREAU

Custom square rear with five CHEREAU mud flaps

Tank protection plate with chromed CHEREAU logo

CHEREAU stainless steel plate (sides and back door)

Customizable tank protection plate with CHEREAU logo

Painted metal plate between cyclist guards

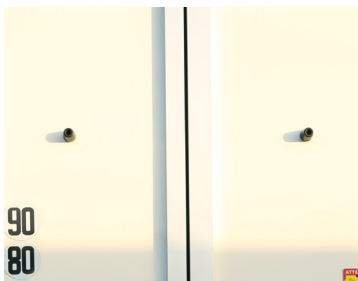

Fairing between mudguards

Painting on rims

**Chrome plated nut
cover CHEREAU**

Cremone covers

Cooling unit painting

Camera

**Rear Cooling unit
380/400V socket**

**TPMS = Tyre Pressure
Monitoring System**

**TPRS = Tyre Pressure
Refill System**

**Interior raise and lower
suspension control**
